THE HONORABLE J. MILLARD TAWES
Government House
Annapolis, Maryland

Dear Governor Tawes :

In accordance with the provision of the laws of Maryland, I have the honor to present to you herewith, the ninety-fifth "annual report covering all operations of the State department of education and the support, conditions, progress and needs of education throughout the State" for the period beginning July 1, 1960 and ending June 30, 1961.

Respectfully submitted,

THOMAS G. PULLEN, JR.
Secretary-Treasurer
State Board of Education
Baltimore, Maryland

1961 MARYLAND LEGISLATION AFFECTING EDUCATION

REGULAR SESSION

School Loans

- Chapter 2, House Bill 82, authorizes a \$1,600,000 bond issue for school construction in Wicomico County.
- Chapter 213, Senate Bill 237, authorizes a \$25,000,000 bond issue for school construction in Baltimore City.
- Chapter 216, Senate Bill 343, authorizes a \$500,000 bond issue for school construction in Howard County.
- Chapter 399, Senate Bill 383, authorizes a \$3,500,000 bond issue for school construction in Harford County.
- Chapter 410, Senate Bill 434, authorizes a \$5,000,000 bond issue for school construction in Frederick County.
- Chapter 414, Senate Bill 446, authorizes a \$2,000,000 bond issue for school construction in St. Mary's County.
- Chapter 424, Senate Bill 480, authorizes a \$1,500,000 bond issue for school construction in Charles County.
- Chapter 432, Senate Bill 556, authorizes the creation of a State debt of \$20,000,000 to supplement the financing of the construction of public school buildings and facilities by the several local political subdivisions in the State.
- Chapter 491, House Bill 236, authorizes a \$1,000,000 bond issue for school construction in Dorchester County.
- Chapter 515, House Bill 443, authorizes a \$10,000,000 bond issue for school construction in Anne Arundel County.
- Chapter 553, House Bill 664, authorizes a \$750,000 bond issue for school construction in Cecil County.
- Chapter 893, House Bill 486, authorizes a \$10,000,000 bond issue for school construction in Prince George's County.
- Chapter 901, House Bill 754, authorizes a \$506,500 bond issue for school construction in Caroline County.
- Chapter 902, House Bill 807, authorizes a \$5,000,000 bond issue for school construction in Allegany County.

Library Legislation

- Chapter 191, House Bill 68, includes certain employees of the Enoch Pratt Free Library, the Department of Public Libraries of Montgomery County, and the Washington County Free Library in the Teachers' Retirement System.
- Chapter 292, Senate Bill 438, authorizes the County Commissioners of Wicomico County to appropriate \$50,000 over a five-year period to the Wicomico County Free Library, Inc.
- Chapter 896, House Bill 677, authorizes the County Commissioners of Anne Arundel County to appropriate \$200,000 to finance the construction of a public library building and library facilities provided such funds are matched by the Annapolis-Anne Arundel Public Library Association.
- Chapter 899, House Bill 697, authorizes the County Commissioners of Charles County to appropriate \$225,000 to finance the construction of a public library building.
- Chapter 904, House Bill 876, authorizes the County Commissioners of Prince George's County to appropriate \$60,000 to finance the construction of a public library building and facilities in the Tenth (Laurel) Election District of the County.

Retirement

- Chapter 111, Senate Bill 9, permits the Board of Trustees of the Teachers' Retirement System to set the rate of interest from time to time from a minimum of 3 per cent to a maximum of 4 per cent. Said regulation applies only to teachers who joined the system on or after July 1, 1955.

- Chapter 112, Senate Bill 10, sets regular interest rates at 4 per cent for those persons who were members of the State Employees' Retirement System on or before June 30, 1955. It permits the Retirement Board of Trustees to set the rate of interest from a minimum of 3 per cent to a maximum of 4 per cent.
- Chapter 184, House Bill 352, repeals a set of obsolete local laws for Allegany County relating to an old Teachers' Retirement Fund.
- Chapter 191, House Bill 68, (See under "Library Legislation.")
- Chapter 395, Senate Bill 368, permits persons to transfer between actuarial-based State pension systems upon paying into their present system certain contributions.
- Chapter 563, House Bill 696, authorizes the County Commissioners of Garrett County to make supplementary retirement payments to certain retired public school teachers.
- Chapter 571, House Bill 774, increases the supplementary pensions paid to certain retired public school teachers in Baltimore County. The amount to be paid is raised from \$2,000 to \$2,400 per year or 40 per cent of their highest average wage during any 5-year period of service, whichever sum is larger.
- Joint Resolution 21, Senate Joint Resolution 31, requests the Legislative Council to study the feasibility of the State's undertaking to pay a certain part of the contribution of each State employee to the Employee's Retirement System.

General Legislation Affecting Education

- Chapter 26, Senate Resolution 41, urges the State Board of Education to revise the oath taken by all public school teachers in the State.
- Chapter 134, Senate Bill 211, authorizes any local board of education in the State to establish a community college, defines what constitutes such a college, and provides for the administration and financing of these colleges.
- Chapter 145, Senate Bill 272, increases the individual allowances from \$100 to \$200 per year for members of the Garrett and Wicomico county boards of education.
- Chapter 172, House Bill 190, increases the individual expense allowance from \$100 to \$200 per year for members of the Somerset County Board of Education.
- Chapter 188, House Bill 8, provides for a deputy State superintendent of schools who shall represent the State Superintendent of Schools in the latter's absence.
- Chapter 257, House Bill 508, repeals an unnecessary power of the Cecil County Board of Education with reference to the sale of certain property to the Jacob Tome Institute, this power having been exercised and the action completed.
- Chapter 268, House Bill 70, provides for an increase of \$4.00 in the fee for motor vehicle instruction and examination permits. The funds thus accumulated are to be used by the State Department of Education to provide for driver education for public high school students in the several political subdivisions.
- Chapter 299, Senate Bill 481, establishes the Charles County Youth Commission. The Youth Commission is to study the services available to and the needs of the youth in the County. The County Superintendent of Schools is a regular member of the Commission.
- Chapter 322, Senate Bill 215, provides for the regulation, licensing, and bonding of persons engaged in soliciting for certain nonpublic schools. All solicitors for nonpublic schools located within or without the State are required to apply to the State Superintendent of Schools for an annual permit.

- Chapter 349, Senate Bill 505, requires the County Commissioners and the Board of Education for Allegany County to provide full educational programs and facilities for retarded and handicapped children through the school term ending after the eighteenth birthday of such children.
- Chapter 355, Senate Bill 74, provides that all Legislative scholarships to be awarded from the Third Legislative District of Baltimore City shall be awarded after a competitive examination by officials of the institution concerned.
- Chapter 358, Senate Bill 94, authorizes the State Department of Education to impose certain restrictions upon degree-granting institutions to prevent the issuance of substandard degrees.
- Chapter 361, Senate Bill 101, raises the State minimum salary schedule for public school teachers from \$3200-\$5300 to \$3600-\$5700. The salary scale for supervisors is increased from \$5400-\$6800 to \$6200-\$7800. Basic aid per pupil is increased from \$28 to \$40, and the local tax rate prerequisite to sharing in the Equalization Fund is raised from 75 cents to 87 cents on each \$100 of assessable property. Funds received by the local units from motor vehicle license fees (A-J) are no longer considered in calculation of Equalization and Incentive Funds. The Incentive Fund is increased from \$20 to \$22 per pupil. In addition each local school system is entitled to receive \$70 per pupil for increased enrollments over the previous year.
- Chapter 373, Senate Bill 212, authorizes the creation of a State debt of \$5,000,000 to be used exclusively for the purpose of supplementing the financing of the construction of public community college facilities in the several political subdivisions of the State.
- Chapter 374, Senate Bill 221, eliminates the restrictive definition of handicapped children from Section 244 of Article 77. Removal of the restrictive definition will permit the State to assist in paying for the education of such children who are over age eighteen.
- Chapter 375, Senate Bill 223, permits the State Board of Education to cooperate with other departments and agencies, both public and private, in providing vocational rehabilitation and in developing the necessary facilities and services.
- Chapter 381, Senate Bill 280, requires certain signalling lights on all new vehicles. Stop signals need be visible only from the rear except in the case of school buses.
- Chapter 412, Senate Bill 443, creates a State Scholarship Board to administer the proposed Federal Scholarship Program. In addition, 608 general State scholarships are established, which program of awards is also to be administered by the State Scholarship Board.
- Chapter 429, Senate Bill 519, increases the individual expense allowance from \$100 to \$250 per year for members of the Queen Anne's County Board of Education.
- Chapter 430, Senate Bill 535, provides a \$500,000 matching State grant to Mt. St. Mary's College for construction of a science laboratory.
- Chapter 433, Senate Bill 557, increases the individual expense allowance from \$100 to \$200 per year for members of the Dorchester County Board of Education.
- Chapter 451, House Bill 347, increases from 30 to 45 acres the limitation on the power of county boards of education to acquire land by condemnation for school purposes.
- Chapter 463, House Bill 540, provides for the establishment and operation of an Insurance Fund for the rebuilding of county-owned public buildings, including school buildings in Prince George's County.
- Chapter 476, House Bill 24, provides that certain unclaimed funds of non-residents of the United States shall be paid to the local political subdivisions for the use of the public schools.
- Chapter 493, House Bill 243, provides that members of the instructional staff at each of the five State training schools shall not be included in the classified service of the State.

- Chapter 519, House Bill 458, authorizes the Superintendent of Schools of Prince George's County, the Maryland State Police, and/or the Prince George's County Police to approve the location of school bus loading zones in that County.
- Chapter 525, House Bill 496, provides for public transportation of nonpublic school children in Baltimore County. The County board of education is authorized to establish new bus routes if necessary.
- Chapter 538, House Bill 569, increases the individual expense allowance from \$250 to \$600 per year for members of the Cecil County Board of Education.
- Chapter 549, House Bill 659, increases from \$300 to \$500 the amount of educational assistance which may be paid to certain war orphans by the State Board of Education.
- Chapter 552, House Bill 663, authorizes the Cecil County Board of Education to sell two school properties to the County Commissioners.
- Chapter 592, House Bill 40, amends Section 268 of Article 77 to clarify a reference to Maryland State College at Princess Anne.
- Chapter 601, House Bill 201, requires that the Montgomery County public school budget be submitted to the County Commissioners at least 45 days before the usual date for levying County taxes.
- Chapter 635, Senate Bill 495, authorizes the establishment of the St. Mary's County Youth Commission. The Commission is to make provisions for the recreational, educational, and health needs of youth in the County. The County Superintendent of Schools is a designated member of the Commission.
- Chapter 657, Senate Bill 362, increases from 6 to 7 the number of members on the Baltimore County Board of Education and increases from 3 to 5 the number of members on the Cecil County Board of Education.
- Chapter 663, Senate Bill 526, requires the Attorney General to review periodically the surety bonds given by persons accepting scholarships in education and to require the Attorney General to take appropriate action should the obligations incurred under the bond not be properly discharged. In addition, all such scholarship holders must render the promised State service within five years after leaving college.
- Chapter 664, Senate Bill 537, permits legislators and other appointing authorities to transfer right of appointment to certain State scholarships to other legislators and appointing authorities. In addition it requires that State scholarships be awarded on or before July 1 of each year.
- Chapter 700, House Bill 251, amends Sections 2(a), (50), and 265 of Article 66½ to require all vehicles used as school buses to be registered as such by the Department of Motor Vehicles.
- Chapter 845, House Bill 853, provides for school crossing guards in Anne Arundel County and places them under the supervision of the Board of Police Examiners.
- Chapter 867, House Bill 757, repeals an obsolete Charles County law relating to the establishment and supervision of McDonogh Institute, the manual training school for the County.
- Chapter 885, Senate Bill 196, authorizes the creation of a State debt of \$18,180,000 for capital improvements, maintenance, and equipment in certain State buildings. Funds from this Act are allotted to the five State teachers colleges as follows:

Coppin State Teachers College.....	\$ 155,000
State Teachers College at Bowie.....	107,700
State Teachers College at Frostburg.....	222,300
State Teachers College at Salisbury.....	191,000
State Teachers College at Towson.....	390,000
Total	<u>\$1,066,000</u>

Chapter 888, House Bill 16, increases the minimum salary schedule for county superintendents of schools from \$8000-\$10,000 to \$10,000-\$14,000. The County Commissioners of the several counties are given the power to approve or disapprove portions of such salaries in excess of the State schedule.

Chapter 889, House Bill 42, amends Section 173 of Article 77 to change references to "normal schools" to "teachers colleges."

Chapter 907, House Bill 967, increases from \$300 to \$480 per year the individual expense allowance for members of the Anne Arundel County Board of Education.

Joint Resolution 26, House Joint Resolution 29, requests the Governor to appoint a commission to study the expansion of public higher education in Maryland.

Joint Resolution 49, House Joint Resolution 9, requests a Commission to study the problem of physical fitness of Maryland youth and to make recommendations to the State Board of Education.

SPECIAL SESSION

Chapter 11, House Bill 3, authorizes a \$750,000 bond issue for junior college construction in Washington County.

**NOTES FROM THE MINUTES OF THE STATE BOARD OF
EDUCATION AND THE BOARD OF TRUSTEES OF THE STATE
TEACHERS COLLEGES**

Special Meeting—July 18, 1960

The Board met in special session to formulate an opinion on the subject of financial support for public schools.

The State Superintendent in an introductory statement reminded the Board that the cooperative study of financing public education in the State has been going on for nearly three years under the sponsorship of the State Department and the local school systems. It has been discussed in meetings of the State Board and in meetings all over the State. All the school superintendents are in favor of the plan proposed. The plan proposed as a result of this study, the so-called Mort Plan, reported in detail in *Education for Our Times, A State Action Program*, issued by the State Department of Education in May, 1959, merely extends the Equalization Plan so that one county may have as good a program as another if it makes the same effort. In brief, the proposal is that:

The State should share in the *total* cost of education as authorized by law.

Each local school system should be able to provide the same quality of education for the same tax effort.

The State's share should average approximately 50 per cent on a State-wide basis. Each local unit's percentage share will depend on its relative tax ability and its educational need.

The State's share should be based on equalized assessments and on equitable measures of need.

The motion was carried by the Board to accept in principle the financial plan as presented, subject to modifications which will include some type of flexible minimum and maximum to be specifically incorporated following further study and agreement by the Board.

The Board agreed to meet in the evening of August 31, 1960, for the purpose of considering the specific proposal for a flexible minimum and maximum to be incorporated in the plan. The staff of the State Department was asked to prepare a report on the plans for the Board's consideration.

August 31, 1960

The Board was informed that Bylaw 16 had been reviewed by the Assistant Attorney General and found that "it is broad enough to permit those counties which keep their financial records on an accrual basis to report on an accrual basis."

Action of the State Board included:

Decision that all resolutions of the State Board of Education for formal approval be written in the form of resolutions and that each be numbered by year and resolution number.

Appointment of six rather than three committees of the State Board to work with the State Superintendent of Education and his staff to consider matters and make recommendations to the State Board. These committees, each with one member and with the President of the Board as ex-officio member of each, covered the following fields—State Department of Education headquarters, public schools, higher education—as well as other problems involving the educational program beyond the high school level—vocational rehabilitation, public libraries, and advanced planning.

Adoption of revised standards for nonpublic schools offering instruction in the following specialized areas—art, barbering, beauty culture, business, dance, drafting, electronics, flight, music, and practical nursing. Following the November 25, 1959, meeting of the State Board of Education when *General Standards for Nonpublic Schools Offering Instructions in Specialized Areas* were adopted, copies of these standards were distributed to interested schools. Among the changes proposed in a subsequent meeting by representatives of these schools was the desirability of presenting all standards applicable to a given type of school in one document. The documents were developed in this form.

Adoption of *Maryland Standards for Nonpublic Schools—Nursery Schools and Kindergartens*, and revocation of all previously existing standards applying to nonpublic nursery schools and kindergartens. "Proposed Standards for Nonpublic Nursery Schools and Kindergartens" had been presented to the Board for preliminary review at the meeting in February of 1960. A meeting was held with the owners of such schools and their suggestions were incorporated into the standards. In addition, certain changes were made in order to expand and clarify some of the sections of the bulletin which had not been thoroughly understood.

Approval of the budget requests for Headquarters (\$1,111,842), Vocational Rehabilitation (\$1,498,774), and the State Teachers Colleges (\$6,044,064) amounting to \$8,654,680, an increase of \$2,117,150 over the appropriation for fiscal year. 1961.

Approval of the appointment of Mrs. Rozelle J. Miller as Supervisor of Special Education, effective September 1, 1960, to succeed Dr. Geneva E. Flickinger now Supervisor of Adult Education.

Approval of a revision of Bylaw 62 which now reads as follows: "Only citizens of the United States shall be employed as teachers in the public school system in the counties or admitted to or be employed by the State Teachers Colleges. For good and sufficient reason, however, the State Superintendent of Schools, upon request of the local school system, or in the case of the State Teachers Colleges, upon the request of the president, may make an exception to the provision of this bylaw, but he shall report all such exceptions to the State Board of Education."

Special Meeting—October 11, 1960

The Board approved with some modification the Balanced Partnership (Mort) Plan for financial support of public education in Maryland. This plan is the result of several years of study by the superintendents of schools, the State Board of Education, the State Department of Education, and lay groups, with Dr. Paul R. Mort of Columbia University as consultant. With the modification, approved by the Board, State aid would be limited in each local school system to support of an expenditure per pupil unit not greater than \$20 more than the preceding year at whatever per cent as a State-wide average the State Legislature may determine.

Special Meeting—October 26, 1960

The Board approved a plan, subject to several suggestions of its members to be finalized at the November meeting, to make a transition to professorial rank in the State teachers colleges. This plan resulted from proposals of a committee of State teachers college presidents and members of the State Department of Education appointed at the request of the State Board to study this transition.

November 30, 1960

Each member of the Board was given a copy of the revised policies on professorial rank at the State teachers colleges, which it approved at a special meeting on October 26, 1960, but which needed some clarification and rewording. The revised policies follow:

1. That as a general rule not more than 55 per cent of the faculty occupy the ranks of Professor and Associate Professor, and that not more than 30 per cent of the faculty occupy the rank of Professor
2. That the criteria be applied to current faculty in determining rank status for the year 1961-62, except that retroactive requirements such as "70 hours in the teaching field" and "Master's plus 45 hours" shall not be used in the 1961-62 transition
3. That in the transition from the 1960-61 scale to the 1961-62 scale, each faculty member be guaranteed one increment in the rank to which he is transferred

CRITERIA FOR PROFESSORIAL RANK**Professor**

1. The earned doctorate, including at least 70 semester hours of credit in graduate and undergraduate courses in the subject field which the person teaches
2. Eight years of successful teaching experience, five years of which shall be at the college level. In unusual circumstances research or other comparable professional activity may be accepted as fulfilling a part of the required years of teaching.
3. Demonstrated proficiency in teaching
4. Demonstrable evidence of continuing interest in the area of specialization through such activities as scholarly research, productive activity, and participation in professional societies
5. Evidence of superior service in such areas as assuming committee responsibilities, working with students individually or in groups,

performing assigned administrative duties, cooperating effectively with professional colleagues, participating and leading in civic and community activities

Associate Professor

1. Doctor's degree normally required. In unusual circumstances an individual may be considered if he has the Master's degree plus 45 hours in the subject field which he teaches.
2. Five years of successful teaching experience with at least three years at the college level. In unusual circumstances research or other comparable professional activity may be accepted as fulfilling a part of the required years of teaching.
3. Demonstrated proficiency in teaching
4. Demonstrable evidence of continuing interest in the area of specialization through such activities as scholarly research, productive activity, and participation in professional societies
5. Evidence of commendable service with such areas as assuming committee responsibilities, working with students individually or in groups, performing assigned administrative duties, cooperating effectively with professional colleagues, participating and leading in civic and community activities

Assistant Professor

1. Doctor's degree is desirable. Minimum requirement Master's plus 30 semester hours in the subject field which the person teaches. Under unusual circumstances individuals holding the Master's degree may be considered.
2. Teaching experience is desirable.
3. Marked growth in quality of teaching
4. Demonstrable evidence of continued growth in such areas as research, scholarly activities, and participation in professional societies
5. Evidence of ability and willingness to participate in such areas as assuming committee responsibilities, working with students individually or in groups, performing assigned administrative duties, cooperating effectively with professional colleagues, participating and leading in civic and community activities

Instructor

1. Master's degree in the subject field which the person teaches. Under unusual circumstances individuals with a Bachelor's degree may be considered.
2. Teaching experience is desirable but not required.
3. Evidence of potential in college teaching
4. Demonstrated interest in, and understanding of, scholarly research productive activity, and professional societies
5. Promise of ability and evidence of willingness to participate in such areas as assuming committee responsibilities, working with students individually or in groups, performing assigned administrative duties, cooperating effectively with professional colleagues, participating and leading in civic and community activities

The State Superintendent reported that the Council of Chief State School Officers would hold its annual meeting in Baltimore during the week of November 5, 1961. The organization is composed of one school official from each of the fifty states as well as Guam, American Samoa, Canal Zone, Puerto Rico, and the Virgin Islands. The United States Commissioner of Education and certain members of his staff usually are in attendance, as are certain representatives from various state departments interested in the

subject under discussion. The deliberations of this Council are of considerable importance and national concern.

It is planned that a part of the program will be devoted to a study of the organization and operation of the Maryland State Department of Education.

Action of the State Board included:

Authorization for the State Superintendent to make appointments of classified employees to the State Department of Education, subject to final confirmation by the State Board of Education. (Resolution No. 1960-1E)

Authorization for the State Superintendent to make appointments of classified employees to the State teachers colleges, subject to final confirmation by the Board of Trustees of the State Teachers Colleges. (Resolution No. 1960-1T)

Approval of professional staff of the State Department of Education to pursue such graduate study during the regular school year and during summer sessions as may be necessary to qualify for higher degrees; and authorization for the State Superintendent to approve such programs of graduate study and the administrative arrangements related thereto upon proper application by a staff member. (Resolution No. 1960-2E)

Approval of the 1962 consolidated budget request in the amount of \$117,731,519 which includes the total public school budget of \$102,210,128. The consolidated request is an increase of \$5,682,100 over the 1961 appropriation. (Resolution No. 1960-3E)

Authorization for the State Superintendent to initiate a study designed to explore the possibility of setting up a State-wide system of 12-month employment of selected teachers; the funds for making this study to be solicited from a foundation interested in such a project; and the local school superintendents, the Maryland State Teachers' Association, and the Maryland Congress of Parents and Teachers to be fully consulted in connection with the aforesaid study. (Resolution No. 1960-4E)

February 22, 1961

Members of the Board were given copies of the *Report on Teacher Education Scholarship Program, 1960*. A condensed summary follows:

<u>Number</u>	<u>1960</u>
Applicants who took the qualifying test.....	958
Eligible candidates	754
Scholarships available	233
a. For current phase.....	152
b. For replacements	81
Applicants offered scholarships.....	703
Accepting	233
Declining—total	470
Declining by forfeit.....	59
Declining after acceptance.....	69
Awards made from State-wide eligible list.....	43
Total number of scholarships in force.....	608

Dr. William M. Brish, Chairman of the State Committee on Educational Television, submitted to the Board a report: "The Use of Television for Instructional Purposes—A Viewpoint." As stated in this report: "Education today faces responsibilities that are both old and enduring and new and perplexing. The tempo of our way of life has speeded up. We now live in a culture that is acquiring new knowledge at a tremendous pace and is applying at an ever increasing rate the discoveries of science to industry, business, transportation, communication, and to all the aspects of everyday living. As a result, many new resources have quickly become a regular and accepted part of our lives. . . . Do media which have brought about spectacular improvement in communications have implications for teaching procedures and school organization? Can television make a worthwhile contribution to the education program? Will it help to expand the educational opportunities for pupils? Is it a resource that can improve the quality of instruction? Not only are questions such as these being asked in many school systems all over the United States, but many projects, experiments, and studies involving the use of television for instruction are actually being conducted. These projects vary in size from installations in a single school building to a network linking all the schools of a large system. As a result, many pupils are now regularly receiving some part of their formal education by television."

Several television projects are now being conducted in Maryland:

1. The Eastern Shore Project
2. The Greater Washington Area Project
3. The Baltimore TV Activities
4. The Washington County Closed-Circuit Educational Television Project
5. Baltimore County Activities

In general, the use of television for instructional purposes in Maryland and elsewhere indicates that it has both potentials and limitations that affect its contribution to the school program and that these are an outgrowth of the nature of the medium itself. When television is used, the potentials and limitations indicate that:

- a. There must be careful planning by studio teachers, classroom teachers, and the supervisory staff.
- b. It should be coordinated with the other experiences of the school day.
- c. Pupils need to understand how to use television as an educational experience.
- d. The televised lesson should be more than a passive experience for the pupil.
- e. New procedures must be developed to handle situations growing out of the limitations of television.

In order to broaden interest among the various school systems of the State in the use of television for instructional purposes, the State Committee on Educational Television is prepared to offer suggestions or advice to school systems; provide current information about the status of State and national projects; participate upon request in local workshops or professional meet-

ings; arrange for demonstrations, visits, or field trips; hold a State-wide meeting for leaders in the various school systems interested in exchanging views about using television; and assist in developing plans for a State program if it becomes desirable.

Dr. David W. Zimmerman reported that this committee, which is composed of superintendents, supervisors, principals, people working directly with educational television projects in the State, and representatives of the State Department of Education, was appointed by the State Superintendent of Schools more than a year ago and charged with the responsibility of evaluating what has been accomplished in this area and developing a point of view for the public school systems of the State in order to assist them in charting the direction for this new medium of education. The State Superintendent pointed out that national committees and committees in other states are trying to determine the place of educational television in the public school program, that there are many problems in connection with the use of television, and that at this time no one is sure which is the best procedure. He added that he hoped the State Committee could recommend a program which the State Board of Education could foster and support after exploring all possibilities.

The Board agreed that this is an area in which it and the State Department of Education should exercise some degree of leadership and requested the committee to complete its study as soon as possible so that additional studies of costs might be made and the Board might make suggestions to the counties for a desirable educational television program.

Dr. Zimmerman reported that he and Dr. Pullen had met with Dr. Philip H. Coombs and Dr. Lester A. Nelson of the Fund for the Advancement of Education in New York to explore the possibilities of a study of better utilization of staff, including twelve-month employment of teachers, in the local school systems of Maryland and the extent to which the Fund might be interested in working with the State Department of Education and the local school systems in such a study. Both Dr. Coombs and Dr. Nelson indicated that they would be interested in discussing this matter with school people in the State, and Dr. Zimmerman and Dr. Pullen are now planning a meeting of the State Committee on Staff Utilization and the superintendents.

Action of the State Board included:

Approval and adoption of the revision of Maryland standards for community and junior colleges. (Resolution No. 1961-1E)

Approval in principle of certain items from the proposed requirements for certification of teachers. This action was taken in view of the fact that local school superintendents are now recruiting teachers for another year. The proposed requirements for the certification of teachers were presented to the Board at its November, 1960, meeting. Revisions have been made since that time, and these proposals, which provide a basic plan for certifi-

cation, were given to the members of the Board, with the suggestion that possibly sometime in the early part of April a special meeting be held to consider them, since the members of the Board had not had an opportunity to study them carefully prior to this meeting.

The State Superintendent reported that he had presented to the school superintendents at their meeting on December 16, 1960, a clarifying opinion concerning the purpose and use of cumulative records of pupil progress. At his request, the Board approved the incorporation of this statement into the minutes of the State Board of Education so that it may be a matter of public record. The statement follows:

The public school system is dedicated to the purpose of providing the best possible educational program for each individual pupil. This program is developed on the basis of comprehensive information concerning the ability, interests, and needs of the pupil. A good teacher must know and understand each pupil he teaches in order to help the pupil learn successfully. A system of cumulative records, including progress reports, subject grades, test scores, medical records, psychological reports, and selective guidance notes, is necessary in order to provide for the systematic gathering and use of information concerning the pupil. Accordingly, the State Board of Education has prescribed certain uniform record forms to be used by the local school systems in setting up such a system for pupils. These forms and the manual for their use were developed by the staff of the State Department of Education in cooperation with representatives from each local school system.

In helping the pupil to learn, the teachers and other school personnel work closely with parents, interpreting to them information about the pupil's ability and achievement in school and receiving in turn information about the pupil's development which the parents think may be helpful. The pupil's cumulative records may be used as a basis for mutual exchange of information with parents and are available to the parents or legal guardians for discussion in a conference with appropriate school personnel. School administrators and teachers recognize that in the education of children they act as the agent of the parents or legal guardians and that parents or legal guardians are entitled to full information about the child. Indeed the best interests of the child can be served by the full cooperation of parent and school.

Special Meeting—April 19, 1961

Mr. Wilbur S. Hoopengardner, chairman of the Superintendents' Committee on Certification, led the discussion of the "Proposed Requirements for Certification" as revised through February 22, 1961. At the February meeting the Board requested that the proposed requirements be sent to the local school superintendents, with the request that they discuss them with the members of their local boards of education. At its February meeting the Board had also approved in principle, because of the time element, the section of the requirements headed "Based on Credit."

The Board gave general approval in principle to the plan as presented in the certification report. Prior to the May meeting when this subject would also be considered, three Board mem-

bers were requested to meet with the Superintendents' Committee on Certification to revise the material in light of the discussion of this special meeting and in light of any further questions the members of the Board might direct to this special committee.

May 31, 1961

In the annual election of officers of the State Board of Education, Mr. Jerome Framptom, Jr., was re-elected president. Mrs. Kenneth S. Cole, a member of the State Board since 1956, was elected vice-president, succeeding Mr. George C. Rhoderick, Jr., whose term expired. Mr. C. William Hetzer of Williamsport was appointed by the Governor to succeed Mr. Rhoderick. The Board adopted the following resolution on Mr. Rhoderick:

Resolution on Mr. George C. Rhoderick, Jr.

The State Board of Education wishes to express its sincere regret upon the retirement of Mr. George C. Rhoderick, Jr., as a member of the Board and as its vice-president. The Board desires to have recorded in its minutes this expression of the high regard and respect which its members have accorded him since he first became a member of that body.

Mr. Rhoderick has been diligent and untiring in carrying out his duties as a member of the Board. Therefore, in consideration of his outstanding abilities and accomplishments, the Board wishes to extend its warm appreciation to him for his services to public education in Maryland during the past four years.

George C. Rhoderick, Jr., was born in Middletown, Maryland, on July 26, 1895. In 1914 he was graduated from Middletown High School. He entered The Johns Hopkins University College of Engineering in 1915. In 1918 he was accepted for military service and was sent to Kelley Field, Texas, where he taught in radio school for the duration of the First World War.

Mr. Rhoderick is sole owner of a publishing business in Middletown which includes three weekly newspapers, *The Valley Register*, Middletown; *Community Reporter*, Mt. Airy; and *Catoctin Enterprise*, Thurmont.

In 1936 Mr. Rhoderick was appointed to the Frederick County Board of Education where he served with distinction for eighteen years. He was president of the Board for nine years, and under his direction the excellent system of modern public schools in the county began to evolve.

At the present time, Mr. Rhoderick is a member of the Governor's Maryland Civil War Centennial Commission and is active in many areas of community service and welfare. He has given unstintingly of his time and energy to many such public endeavors.

The members of the State Board of Education are indeed grateful to Mr. Rhoderick for the unique contributions he has made on behalf of public education in Maryland and again wish to express their deep regret upon his retirement from their membership.

The State Superintendent presented to the Board an opinion dated March 8, 1961, by the Assistant Attorney General, James O' C. Gentry, which states: "At your request I have reviewed Section 165 of Article 77 which provides, 'the Board of Trustees shall authorize the course or courses of studies to be offered, including courses for observation and practice in teaching.' This

office is of the opinion that the above provision merely requires that the Board of Trustees authorize the general or over-all program of study, not the specific subjects to be taught."

The State Superintendent announced officially the accreditation of the State Teachers College at Bowie by the Middle States Association.

The State Board approved the request of Dr. William E. Henry, President of Bowie, in accordance with the desire of his faculty and students, that the new Laboratory School at Bowie be named in honor of the late Charlotte B. Robinson, music instructor at the college for thirty-seven years.

Other action of the State Board included:

Appointment of Dr. David W. Zimmerman to the position of Deputy State Superintendent of Schools, effective June 1, 1961.

Dr. Zimmerman was made Assistant Superintendent in Finance and Research on March 1, 1950, and on August 31, 1955, his title was changed to Assistant State Superintendent and his duties broadened. The Attorney General ruled on October 26, 1959, that the Assistant State Superintendent of Schools, by virtue of Section 46, Article 77 of the *Annotated Code of Maryland*, is de facto the deputy of the State Superintendent of Schools. The General Assembly of 1961 changed Section 46 so as to authorize the title of Deputy State Superintendent of Schools.

Adoption of amendments to the State Plan for Further Extension of Library Services to Rural Areas—Resolution No. 1961-3E (See section on Division of Library Extension for further details.)

Grant to the University of Baltimore full authority to award the Bachelor of Arts degree to qualified candidates. (Resolution No. 1961-4E)

Grant to Xaverian College, Silver Spring, full authority to award the Associate in Arts degree to qualified candidates. (Resolution No. 1961-5E)

Approval of the new "Requirements for Teacher Certification"—Resolution No. 1961-6E. (See section on Certification for further details.)

Prior to this action, Mr. Wilbur S. Hoopengardner, Chairman of the Superintendents' Committee on Certification, reminded the Board that at the special meeting of April 19, it had discussed the "Proposed Requirements for Certification" as revised through February 22, 1961, and had given general approval in principle to the plan as presented in the report. However, the Board had made suggestions concerning the report, and a committee of the Board had been appointed to meet with the Superintendents' Committee on Certification to revise the material in the light of the discussion. The committee held two meetings to consider a draft of a revised report. Mr. H. Orville Berwick reported that the Committee on Teacher Education and Professional Standards of the State Teachers' Association had approved

the proposed requirements in principle. The State Superintendent cautioned the Board that it is not possible to make an instrumentality such as this perfect in the beginning and that from time to time it might be necessary for the State Superintendent to ask the Board to make modifications in the requirements.

Repeal of Bylaw 16 which required each county board of education to go beyond the requirements of Section 72 of Article 77 by preparing a statement of receipts and expenditures by individual schools. Section 72 requires each county board of education to publish and distribute an annual report on the condition and needs of each respective local school system. (Resolution No. 1961-8E)

As the Board of Trustees of the State Teachers Colleges, approval of the 1963-1967 capital improvements budget in the amount of \$21,807,490 which includes sub-budget totals for each of the five State teachers colleges. (Resolution No. 1961-1T)

As the Board of Trustees, authorization for each of the presidents of the State teachers colleges to require all students to pay a curriculum fee of \$10 per semester. (Resolution No. 1961-3T)

DIVISION OF CERTIFICATION AND ACCREDITATION

The services of the Division of Certification and Accreditation for the year 1960-61 may be reported generally under six broad headings:

1. Certification of teachers
2. Accreditation of educational programs
3. School plant planning
4. High school equivalence certificates
5. School lunch program
6. Teacher recruitment

CERTIFICATION

As will be seen from TABLE 49, page 123, the number of certificates issued to teachers, supervisors, and administrators during the academic year 1960-61 has continued to increase. In 1959-60 there were 4,407 certificates of all types issued, while in the academic year 1960-61 there were 5,124 certificates issued in the over-all certification of teachers for the State. Since there were within the counties of Maryland 1,306 more teachers employed in 1960-61 than in 1959-60, while only 717 additional certificates were issued, there is an indication that the percentage of teacher turnover continues to show some decrease for the State as a whole. Of the total number of certificates issued, 2,329 were emergency or other substandard certificates, while 2,795 certificates were issued to teachers who had full qualifications for regular certification. Thus it can be seen that 45.5 per cent of the certificates issued were based upon qualifications which failed to meet the full requirements for regular certification. However, of the 2,329 teachers who were issued emergency or other substandard certificates, 1,659 had met the requirements for the baccalaureate degree. Over the past several years the percentage of teachers issued emergency or other substandard certificates but who held college degrees has ranged from 60 to 70 per cent. For the year 1960-61 this percentage is 71.2. Some teachers in this category have excellent qualifications and some have actually met Maryland's requirements for a regular certificate but have engaged in no recent formal study. Others have good subject matter preparation but lack some of the necessary professional preparation required for full certification. Any holder of the emergency or provisional degree certificate can usually with relatively little effort qualify for regular certification in one of the various teaching fields.

On May 31, 1961, the State Board of Education adopted new basic certification requirements designated as Bylaw 77. Proposals for revision of the requirements for special teaching areas were also developed and are under further study by various groups and will probably be adopted during the 1961-62 school year. Among the changes in certification procedures adopted, two

new approaches to certification are particularly significant. Graduates of institutions accredited by the National Council for the Accreditation of Teacher Education who are recommended by the college may be issued a Standard Professional Certificate without reference to the detailed course work included in the students' college programs. Reciprocity with states within the Northeast Reciprocity Compact Area for the issuance of the Standard Professional Certificate at both the elementary and secondary levels has also been provided.

ACCREDITATION

Institutions of Higher Learning

Two new junior college programs were given initial approval to operate in the State during the past academic year. One institution, formerly offering baccalaureate degrees in Law and Commerce only, was given conditional approval for the issuance of the B.A. degree, subject to review within a three-year period. Approval for the awarding of the Associate in Arts degree was granted to one nonpublic junior college.

Members of the Department served on the committee of the Middle States Association of Colleges and Secondary Schools which re-evaluated former accreditation of one college of the State. One additional State institution was given initial accreditation by Middle States during the academic year as a result of a review of progress on recommendations made in a previous evaluation. The Department reviewed the proposed program for two prospective institutions at college or university level on which action was withheld pending further development of the plans for operation.

During the academic year the Maryland State Board of Education approved programs for the preparation of secondary school teachers at three of the State teachers colleges. The State Board of Education also approved the awarding of Bachelor of Arts and Bachelor of Science degrees to nonteacher education students for the three above-mentioned State teachers colleges. During the year the teachers colleges have continued study and development of the curriculum in order to meet present needs. At the close of the academic year the State-approved colleges and universities could be classified as follows: 15 two-year colleges and 29 four-year colleges and universities, 21 of which were approved for teacher education.

Nonpublic Academic Schools Below College Level

The number and kind of academic schools below college level which were operating in the State in 1960-61 and which had been approved by the Department were as follows:

<u>Type of School</u>	<u>Number</u>
Secondary	52
Secondary-Elementary	8
Secondary-Elementary-Kindergarten	1
Secondary-Elementary-Kindergarten-Nursery School	1
Tutoring	6
Special	18
Elementary	4
Elementary-Kindergarten	5
Elementary-Kindergarten-Nursery School	4
Primary	1
Primary-Kindergarten	5
Primary-Kindergarten-Nursery School	4
Kindergarten	37
Kindergarten-Nursery School	19
Nursery School	32
Total	197

Nonpublic Secondary Schools

On the approved list of nonpublic academic secondary schools there are 62 regular secondary schools and 6 tutoring schools. Of these 68 schools, 45 were church-operated and 23 were privately operated. There are other nonpublic schools in Maryland which are not on the list since church-operated schools and private schools which have a charter from the Maryland Assembly are exempt from approval requirements; however, any of these institutions may request approval of the State Superintendent of Schools at their discretion.

Nonpublic Nursery Schools, Kindergartens, Elementary Schools, and Special schools

These schools are operating in the following ways:

Cooperatives with parents participating	34
Cooperatives administered by parents who do not participate daily	12
Smaller centers (3 groups or less)	36
Larger centers (more than 3 groups), owned by individuals	10
Schools governed by board of directors (two of these centers offer a summer program)	28
Church-sponsored centers	6
Others (sponsored by housing projects, civic groups, colleges, etc.)	15
Total	141

There were 20 centers which provided, in addition to an educational program, a service for the full-day care of children of working parents. Twelve of these centers were approved in January, 1948, when the law requiring approval went into effect. Enrollment in the nonpublic elementary and preschool centers

during the two years 1959-60 and 1960-61, including new schools approved during each of these years were as follows:

<u>Type of School</u>	<u>Enrollment *</u>	
	<u>1959-60</u>	<u>1960-61</u>
Nursery schools	1,938	1,888
Kindergartens	2,383	2,345
Elementary schools	3,051	† 3,122
Special schools	621	839
Total	7,993	‡ 8,194

* Figures are those for all schools listed as operating during the year, including new schools and those removed from list during year and closed at end of year.

† In the five schools terminating at eighth grade there were 181 children enrolled.

‡ In the total enrollment there were 1,338 day-care children enrolled. Actually the total number of children attending centers where a day-care program is operated as a part of that center in addition to the approved part of the program is appreciably larger than the figure of 1,338. Many of the centers do not include in their annual reports the enrollment figures for children in the unapproved part of the operation.

Nonpublic Specialized Schools

In this classification eight schools applied for approval and received certificates and 28 schools received tentative approvals. Thirty-one schools closed in the period July 1, 1959, to June 30, 1960. During the period of this report consultants were engaged in connection with the approval of electronics courses and courses in automation. Experts from television stations, industry, the Federal Communications Commission, and the Johns Hopkins Research Laboratories were among those consulted. In August of 1960 the State Board of Education approved the revised standards for nonpublic specialized schools. At the same time teacher certification standards were approved. In the spring of 1961 the Legislature passed legislation requiring the licensing of solicitors for certain nonpublic schools. Standards have been developed for use in the licensing of solicitors and are awaiting final approval of the State Law Department and the State Superintendent of Schools. During the year new legislation pertaining to the operation of schools in beauty culture was enacted. In May of 1961 a State-wide meeting of beauty school owners and operators was held under the sponsorship of the Department for the purpose of study of the new legislation and discussion of operating procedures resulting therefrom. A representative of the Division attended the annual convention of the National Association of State Approval agencies in Charleston, South Carolina. During the academic year July 1, 1960, to June 30, 1961, approximately 32,600 students were enrolled in the nonpublic specialized schools and approximately 1,000 teachers were employed in these schools.

HIGH SCHOOL EQUIVALENCE

As of June 30, 1961, the equivalence program completed its twentieth year. At the close of the first ten-year period, June, 1951, approximately 7,000 certificates had been issued. The number more than doubled during the next ten-year period and now totals 23,520.

Several business firms and industrial plants are offering study courses to prepare employees for the examination, and at the penal institutions, where courses are offered as rehabilitation therapy, a special examination is given at least once annually.

SCHOOL PLANT PLANNING

During the past year the Assistant Director of the Division examined and recommended for approval the following:

Sites	45	Contracts	106
Preliminary plans	113	Deeds, right of ways, etc.	128
Final plans	96	Change orders	332

Consultative services were provided by the Division to superintendents and architects in the broad aspects of school plant planning. The Assistant Director of the Division also served as coordinator of the teachers college construction program, working with the college presidents and various State agencies in developing master plans, immediate and long-range capital programs and budgets, educational specifications, and architectural planning for individual buildings and the supervision of their construction.

TEACHER RECRUITMENT

During the 1960-61 school year the public schools of Maryland required a total of 1,413 high school teachers in the various subject areas to fill vacant positions and to staff new classrooms. However, the teacher preparation institutions of the State were able to supply only 749 teacher graduates to meet that demand. The most severe shortages continued to exist in the fields of mathematics and the physical sciences. During the same period, the public schools needed 1,270 elementary teachers to staff their classrooms. A total of 553 prospective teachers were graduated from State colleges and universities in June, 1960. As in the past, the shortages in teaching personnel, on both the high and elementary school levels, were met by recruiting out-of-State teachers, former teachers, and by employing teachers with emergency or provisional certificates.

TEACHER EDUCATION SCHOLARSHIP PROGRAM

The 1960 Teacher Education Scholarship examination was administered on Saturday, February 27, 1960, in twenty-five State-wide test centers. For the first time since 1957 the same examination was used for both the Teacher Education Scholarship Program and the General Scholarship Program. Students made their choice of scholarship at the time of registration.

Pre-test registration indicated that 1,847 students were interested in sitting for the examination. The test was actually administered to 1,548 students at the various test centers. A breakdown of the registration data for the 1,548 students is as follows:

<u>Type of Registration</u>	<u>No.</u>
Teacher Education only.....	468
Senatorial only	590
Teacher Education and Senatorial.....	490
	<hr/>
	1,548
Total Teacher Education.....	958

Of the 958 Teacher Education candidates 754, or 79 per cent, were placed on the eligible list.

The first scholarship offers were sent out on April 4, 1960, including scholarship openings accrued from previous years. A total of 233 Teacher Education scholarships were available for distribution. Of the 754 eligible candidates, 703 were offered scholarships. Two hundred thirty-three students accepted and 470 declined. Sixty-three of those declining did so by forfeit, and 69 declined after having previously indicated acceptance of the offer.

The 1960 phase of the Teacher Education Scholarship Program was terminated on November 28, 1960, when acceptance of the final award was received by the Department.

DRIVER EDUCATION

The 1961 session of the Maryland General Assembly enacted legislation which will provide special financial support for public school driver education programs. It is believed that this legislation will have a most salutary effect on the quantitative and qualitative growth of driver education programs in this State.

SCHOOL LUNCH AND DIRECT DISTRIBUTION OF COMMODITIES PROGRAM

School Lunch and Special Milk Programs

To insure the lowest possible distributive cost to the schools participating in the School Lunch and Special Milk Programs, reimbursements were paid during the 1960-61 school year on the

applicable fraction of a cent. The desired result in that distributor cost of milk remained more stable was achieved. For the most part there was also a decrease in distributor costs of milk to the schools. State-wide, there was a 5.2 per cent increase in participation in the Special Milk Program in 1960-61 over 1959-60. For the School Lunch Program there was a State-wide increase of 8.7 per cent in participation over the previous year. With the exception of two counties, all counties and Baltimore City shared in this increase in participation. Due to the increased participation it was necessary to reduce the rate of reimbursement to the local school units from \$.04 to \$.025, effective April 1, 1961. A later supplementary payment was made to the local units, and the over-all reimbursement per lunch for the entire year was approximately \$.0375.

Direct Distribution of Commodities Program

For the school year July 1, 1960, to June 30, 1961, 851 schools participated in the program of distribution of U. S. Department of Agriculture donated commodities. This program was administered and supervised through the local boards of education and through direct contact with the participating nonpublic schools. Current agreements covering the distribution of U. S. Department of Agriculture donated commodities were renewed except for the agreement with the Department of Catholic Education. In the interest of more direct and less complicated administrative procedures in handling the work with the schools of the Baltimore Diocese of the Roman Catholic Church, individual agreements were obtained from the schools formerly sponsored and administered through the Department of Catholic Education.

Foods were distributed to all eligible schools and school systems based on average daily participation, inventories on hand at the local level, and knowledge of past experiences in utilization.

DIVISION OF INSTRUCTION**SUPERVISORY ASSISTANCE TO THE COUNTIES AND TO INDIVIDUAL SCHOOLS IN THE AREAS OF ORGANIZATION, ADMINISTRATION, AND INSTRUCTION**

The annual Maryland Conference on Secondary Education, attended by high school supervisors and principals from all local units, was held on March 23 and 24, 1961. Dr. Jerome S. Bruner, Professor of Psychology, Harvard University, set the stage for the conference in the opening session when he discussed recently developed concepts of the psychology of learning. In subsequent sessions, applications of these principles were developed in the fields of English, mathematics, and the fine arts. Panel discussions in each of these areas were stimulated by nationally known authorities including Dr. Joseph Mersand, Past President of the National Council of Teachers of English; Dr. Howard O. Fehr, Head of the Department of Teachers of Mathematics, Teachers College, Columbia University; and Dr. Edwin Ziegfield, Head of the Department of Fine and Industrial Arts, Teachers College, Columbia University.

The Maryland Conference on Elementary Education, which was held this year on April 13 and 14, 1961, is one means by which supervisors and administrators in the State keep abreast with new developments in the elementary school. The speakers, all eminent educators actively engaged in study and revision of elementary school programs, gave the newest developments in selection of subject matter and the organization of schools for most effective learning. Specific subject areas receiving special emphasis at this Conference were social studies, language arts, science, and mathematics.

Revision of Curriculum

Revision of curriculum continues to be a major concern in practically all of the school systems. This year many of the counties continued revision of the elementary school social studies courses. This was usually done with careful study of the high school program in order that the result might be a continuous sequence from grade one through grade twelve. Particular attention is being directed to concepts and values relating to conservation of resources, world interdependence, dignity and worth of the individual, and responsibility for achieving democratic action. There is also much emphasis on broadening the content to include the geographical, economical, political, historical, and cultural aspects of each problem selected for study.

Science and mathematics courses for all grades are also receiving considerable attention in most school systems.

Language arts continues to receive attention in many of the systems. New procedures and materials are being used in teach-

ing pupils to read. Most systems recognize the ever present need to place more emphasis on oral and written English.

Assistance in Accreditation

Individual high schools scheduled for evaluation by the regional accrediting association were assisted in their preparations for this service. Also, two members of the Department staff participated on invitation of one local unit on a committee to conduct a detailed evaluation of a junior high school in that school system.

Along with helping the high schools in preparing for their evaluation, the Division assisted with several less formalized evaluations. Using the Boston Elementary Evaluative Criteria several elementary schools were evaluated in St. Mary's and Anne Arundel counties. There were special projects carried out by using the services of a number of State supervisors plus several local supervisors and local elementary school principals to form a visiting committee. These committees spent two days in each school and then gave written reports including commendations and recommendations for the particular school's use.

In-service Education of Teachers

Programs for the in-service education of principals, teachers, and other local staff members were marked by their variety and number during the year. Most of these programs were for several days' duration.

All the local systems recognize the value of in-service education for teachers. Such education involves teachers in course of study revision, in study, in experimentation, in working with specialists, and in evolving new and better techniques of teaching. The practice of giving school time for in-service education is growing; some systems give one half day per month, others three or more days each school year. Many systems use the last two weeks in June for in-service work.

The child study program continues as a phase of the in-service programs for the teachers in the State. In many instances the responsibility of leadership for the program has now been assumed by the local school systems. The State Department of Education provided consultant service from the Child Study Institute at the University of Maryland to four local school systems. There is need to encourage a renewed interest in child study. Opportunities are being provided for the many new teachers who have entered the local school systems in the past five years to get information on child growth and development and the techniques for understanding the pupils in their classrooms.

Interest continues in the changing emphasis in mathematics, and again particular attention was focused on the improvement of the teaching of arithmetic in the elementary school. During

June a series of two-week workshops for classroom teachers were sponsored by this Department. One workshop was held in Salisbury for all teachers of the first, second, and third grades in Wicomico and Somerset counties; another was held in Snow Hill for Worcester County. Both of these followed last year's workshop on general content and this year the emphasis was on the content for the primary grades with much consideration and thought given to procedures and materials. A third workshop for elementary and junior high school teachers of Allegany and Garrett counties was held at the State Teachers College at Frostburg. The purpose was to develop a better understanding of some of the basic principles of mathematics that are required in teaching the newer materials in arithmetic. As knowledge and uses of mathematics develop and changes in curriculum are proposed, the need for more in-service education will continue to increase.

A two-week institute on elementary school mathematics for principals, supervisors, and administrators sponsored cooperatively by this Department and Anne Arundel County was held at the Severna Park High School in Anne Arundel County. The consultant-lecturers for the workshop were mathematicians and psychologists directly involved in the outstanding experimental mathematics projects currently being conducted in this country. More than 175 participants from 19 local school systems and teacher-training institutions attended.

The Use of Television in Instruction

Television continues to be used as a means of enriching classroom activities and also in direct teaching, especially in art, music, French, and science. The programs in the State, with the exception of the nationally known experiment in Washington County, are telecast from local commercial stations in Baltimore City, Washington, D. C., and Salisbury. These programs are watched not only by the pupils in the classrooms but also by parents. Direct teaching has as its "raison d'être" the fact that many elementary teachers at the present time need additional information and skills in some subjects such as a foreign language, music, and art; and local school systems cannot furnish all of the special teachers needed in these areas.

The television teacher can be a specialist in the subject with time to develop lesson materials and procedures and thus is able to present rich and varied lessons. As the programs have progressed, however, it has become apparent that success with this medium is in the hands of the regular classroom teacher. Pupils, if they are to really profit by television, do not just "watch" a program; there must be preparation for each lesson and constant follow-up. This requires a technique on the part of the classroom teacher new and different from that usually followed when he is in direct control of material to be presented to the class. It also

requires a way of learning on the part of the pupil which is different from that when he is face to face with his instructor.

State-wide Studies

Members of the Division of Instruction were actively involved, along with professional representatives from the local units, in a number of State-wide studies which were initiated, continued, or concluded during the past year. Of paramount importance among these was the completion of the report of the State Committee to Study Maryland Public Secondary Schools under the chairmanship of Dr. David W. Zimmerman, Deputy State Superintendent of Schools. This report, the result of a two-year, comprehensive analysis of the State's high school program, will be distributed locally in the fall of 1961 for critical study by superintendents, central staff members, high school principals and teachers, teacher-training institutions, boards of education, and interested citizens. Based upon a revised expression of philosophical beliefs and objectives and in the light of the current major controversies in secondary education, it presents principles and policies for the guidance of local school systems in the organization, administration, and services of their schools, including detailed treatments of each area of the curriculum. Contributing to the preparation of this report, in addition to members of the Department staff, were representatives from each of the twenty-four local school systems.

Consultant service was rendered by Dr. Matthew P. Gaffney, formerly Larsen Professor of Education, Harvard University; Dr. Will French, Emeritus Professor of Education, Teachers College, Columbia University; Dr. William T. Gruhn, Professor of Education, University of Connecticut; and Mr. Harry Spencer, Director of Instruction, Floral Park, New York. Dr. Vernon Anderson, Dean of the College of Education, University of Maryland, and Dr. Wilbur Devilbiss, President, State Teachers College at Salisbury, met frequently with the Committee and provided invaluable assistance.

A related report on high school standards, designed to complement the foregoing, is now in the process of preparation by a second State Committee appointed in the spring of 1961. It is anticipated that this report will be ready for initial release in about one year.

In striving for an effective educational program there is need to examine constantly what all of the schools are doing and to make revisions which more nearly meet changing economic, political, and social conditions. It seems appropriate at this time to make a State-wide study of elementary schools and to give careful thought to goals, principles of learning, the nature of the elementary school child, and the learning he needs for the world in which he is living and will live in the future. A steering committee composed of supervisors, principals, members of the

Division of Instruction at the State Department of Education, and the Maryland Superintendents Committee on Supervision and Curriculum was organized this year. This committee has drafted tentative plans for a study of elementary schools which should get under way in 1961-62.

CONSULTATIVE SERVICES AND COOPERATION IN CURRICULUM DEVELOPMENT AND IN THE DEVELOPMENT AND IMPROVEMENT OF MATERIALS OF INSTRUCTION

In addition to the assistance rendered to the local school systems by members of the Division of Instruction, arrangements were made with colleges and other agencies both in and out of the State to have resource people with highly specialized knowledge and skill serve as consultants. By this means more and better consultant service for teachers was provided in literature, language arts, social studies, science, and other areas. In addition to regional meetings, consultants worked with many individual school systems in the areas of language arts, mathematics, and social studies.

One of the highly important activities this year has been the improvement of science education in grades one through twelve. This included working with high school science teachers in classroom observations and faculty meetings, assisting in the selection of science equipment and the development of science projects for school science fairs, providing for county and school groups other consultant help in science, and attending county and regional conferences for science teachers.

At the elementary level lectures and demonstrations on the teaching of science have been given. The supervisors have served as consultants for a number of school committees working on elementary science, planning school science fairs, and demonstrating how to use science kits and science tables to improve learning in science.

The New Curriculum Center

Considerable time was spent in organizing curriculum materials at the Division of Library Extension for the new State Curriculum Center. The State Committee for the Curriculum Center met a number of times to consider the following:

- Definition of the Curriculum Center
- Persons to be Served
- Materials in the Center
- Services of the Center
- Personnel of the Center

Improvement of Curriculum Materials

The new bulletin, *Music in Our Maryland Schools*, was published and introduced in numerous counties. Meetings were held

in three areas of the State (Eastern Shore, Tri-counties, Howard County) to introduce this bulletin to teachers, principals, and supervisors. Consultants and members of the State Music Committee presented the philosophy of the teaching of music in Maryland public schools and suggestions of ways to implement the use of the bulletin.

The fourth book of the Conservation Series, *Maryland's Rocks and Minerals*, went to press. A script of "The Geology of Maryland," which will supplement *Maryland's Rocks and Minerals* in both filmstrip and slide form, was prepared. The commentary is both printed and in tape recording form.

An Audiovisual Catalogue consisting of the audiovisual materials housed in the new State Curriculum Center was prepared and is being printed.

A meeting of the State Coordinating Committee was held to evaluate materials for the 1961 List I, the Supplement, List II, and to discuss distribution policies. The group agreed that List II should be revised and should consist of materials which were developed by the Maryland non-State agencies and were useful to schools.

The Baltimore *Sunpapers* continued to supply each of the 23 county boards of education and this Department with free monthly prints (September until June) of the news film "Screen News Digest."

The *Baltimore News-Post* continued to sponsor free monthly prints of the Current Affairs Filmstrips to the junior and senior high schools of Baltimore, Harford, Anne Arundel, and Howard counties and Baltimore City.

HEALTH AND PHYSICAL EDUCATION

In addition to rendering usual services to school units through workshops, conferences, and visitations, the Supervisor of Physical Education and Recreation served on an Elementary School Playground Committee in Montgomery County and a committee that is evaluating the physical education, interschool and intramural programs in Baltimore County. He also worked closely with the State Committee to Study the Maryland Public Secondary Schools and a subcommittee of the Maryland Association for Health, Physical Education and Recreation to study time allocation given to physical education in all Maryland political subdivisions.

Plans were completed by Towson and Frostburg State Teachers Colleges for instituting major programs in secondary school physical education in the fall of 1961. At present Maryland schools are experiencing a critical shortage of trained women physical education teachers. It is hoped the two new Maryland college training programs will in time meet most of the need.

Health

As co-chairman of the Maryland State School Health Council, the Supervisor of Physical Education and Recreation assisted a subcommittee in studying and making recommendations concerning the law which requires an annual census of handicapped children. The report of the subcommittee has been submitted to the State Superintendent of Schools.

Interschool Sports

A subcommittee of the Maryland Public Secondary Schools Athletic Association completed an evaluation study of the structure, organization, and activities of the Association. The purpose was to improve the State high school athletic program.

The Supervisor of Physical Education and Recreation served as Health Chairman of the Maryland Congress of Parents and Teachers. Among other duties in this connection he planned and conducted a workshop for local P.T.A. health chairmen responsible for administering it. General acceptance of and satisfaction with the way the Association is meeting its responsibilities and functions were revealed. However, desirable changes that should be made became evident. For example, an overwhelming majority of school people indicated the Association should, as soon as possible, organize district track and field meets to be held prior to the State meets. This was accomplished for the first time in 1961 when seventeen district meets were held. Only boys who qualified in district meets participated in the two State meets, one for Class AA and A schools, another for Class B and C schools. The number of boys who participated in Association sponsored meets was, of course, greatly increased over other years. The entire 1961 expanded track program was conducted smoothly and successfully. Excellent cooperation was received from the counties and schools.

For the first time in many years a clinic for football coaches was sponsored by the Association. Approximately 120 coaches and principals attended the two-day meetings. The coaching staff of the University of Maryland served as lecturers and consultants. A similar clinic is planned for next year. Forty-nine member schools sponsored football in the fall of 1960.

Outdoor Education

Washington County inaugurated an Outdoor School on a pilot basis in the spring of 1961. Close cooperation was received from the Frederick County Outdoor School. The few classes that were accommodated in the starting program used a camping facility, Camp Airy, procured by the Washington County Board of Education.

Prince George's County employed a consultant, Dr. L. B. Sharp, to make recommendations on several tracts of land pres-

ently owned, and others which might be acquired, for their potential use in outdoor education programs.

Cecil County sent a pilot group to the Harford County Outdoor School. Those counties which have outdoor schools, established for more than one year, are Frederick, Harford, and Calvert.

The Supervisor of Physical Education and Recreation assisted Mr. Andrew Mason and Dr. L. B. Sharp, consultant, in an evaluation study of the programs of the three forestry camps operated by the Maryland State Department of Welfare.

PUPIL PERSONNEL AND PARENT EDUCATION SERVICES

During the 1960-61 school year programs of pupil services—guidance, health, psychological, pupil personnel, and school social work services—continued to grow steadily. This Department emphasized the development and coordination of these services as closely inter-related functions which are an integral part of the total instructional program. The Supervisor of Pupil Services and one of the Supervisors of Special Education worked in a cooperative and consultative relationship with the directors of pupil services and the supervisors of guidance, health, psychological, pupil personnel, and school social work services in the local school systems to provide State-wide leadership in this area.

Significant achievements during the year were:

Coordination of Pupil Services

Emphasis was given to provision for local supervisory leadership, coordination with community resources, appraisal of existing services, and study of automatic data processing as related to school records.

Six local units now have directors of pupil services with supervisors in the area of pupil services responsible to them. This pattern of organization is proving particularly effective in the large school systems. Planned programs of coordination with local administrative and teaching personnel are carried out. Other local units have made a definite effort to coordinate services by close cooperation of the supervisors responsible for these programs.

State-wide committees were established to discuss the possibilities of using automatic data processing not only for pupil accounting records but also for the cumulative record and individual pupil schedules. Many local units are experimenting with programs designed to make the keeping of records more effective and their use more meaningful.

Guidance

Emphasis was given to provision for local supervisory leadership, provision of additional counseling services for pupils, and

evaluation of existing guidance programs. Ten full-time guidance supervisors in the local units assumed responsibilities during the past year.

Psychological Services

Emphasis was given to further definition of the function of the psychologist working in the local school system and to the development of an organized group of psychologists employed by local boards of education.

There are 42 psychologists employed in the local school systems. The psychologist is being used increasingly as a consultant and is working with teachers in the prevention of problems as well as in diagnosis and individual evaluation.

Pupil Personnel Services

Emphasis was given to the coordination of pupil personnel services with those services offered by community agencies and to the implementation of the team concept within the local school system. Continued emphasis was given to preventive work with students through early identification and referral of those students who have problems of adjustment. Particular emphasis was given to work with the student who plans to drop out of school before the completion of the secondary school program.

In each local school system definite programs were carried out involving school personnel and personnel from community agencies. In the small units where specialized personnel are not available through the school program, community resources were used extensively.

Pupil personnel workers participated actively in the State-wide study of drop-outs. A joint project with the Employment Service was continued during this year in an attempt to follow-up students who drop out of school and help them with effective job placement. A State-wide committee is being organized to give particular attention to this problem.

Parent Education

There were many parent education groups in the State during the past year. Local units continue to assume responsibility for this program, with this Department providing consultant service as requested.

SPECIAL EDUCATION

Continued efforts have been directed toward development of new services and the improvement of existing programs for atypical children throughout the State. All local school systems now have at least one special class. Five classes have been organized in local systems that previously had no special classes

and over 12,000 pupils received speech therapy. Services were increased for children with specific learning disorders such as aphasia, strephosymbolia, and perceptual dysfunctions. Workshops, conferences, and committees continued to provide means by which programs can be improved.

A workshop for teachers of educable and trainable retarded was organized. This workshop was held at Towson State Teachers College, June 19-23. Four outstanding specialists, nationally known in the field of special education, acted as consultants. One hundred sixty-three teachers, principals, and supervisors participated in the conference.

A plan was worked out with the University of Maryland and Southern Regional Education Board to implement their contractual arrangement to provide scholarships to George Peabody College for Maryland's teachers of the partially sighted and blind.

ADULT EDUCATION

The Committee on Adult Education continued its study of adult education in Maryland. In addition to outside consultants, the Committee heard representatives from such groups and organizations as the Maryland Congress of Parents and Teachers; the Extension Service, the University of Maryland; YMCA; the Baltimore Museum of Art; The Enoch Pratt Free Library; labor; and the C & P Telephone Company. The Committee will present recommendations to the State Superintendent of Schools sometime during 1961-62.

The availability of State funds for programs of nonvocational adult education, though publicized at a late date, caused several local school systems to re-examine their offerings. No doubt, some additional nonvocational programs will be developed in 1961-62.

A workshop for State Directors of Adult Education was held under the auspices of the U. S. Office of Education in Washington in June, 1961.

A project in liberal adult education was initiated in Calvert County. Participants included the local superintendent of schools, his entire supervisory staff, the local health doctor, and several community leaders. The project took the form of a seminar, with emphasis on reading, study, and discussion of basic questions relating to the nature of man.

The Baltimore County Public Schools were awarded a grant of \$4,000 from the Fund for Adult Education for the purpose of further developing their programs of liberal adult education and public responsibility. The grant was made for the year 1961-62 on nomination of the State Superintendent of Schools to the National Association of Public School Adult Educators. As part of this program, Baltimore County has added another supervisor of adult education to its staff.

Civil Defense has recently been introduced into programs of

adult education. The question of Maryland's position on this matter should be discussed and, if considered feasible, a program should be developed.

The relationship of adult education to the role of the aging population is being considered. It is especially important to consider what unique features this group of senior citizens presents in planning programs of adult education.

Another area of concern is that of the mental health of adults. This area is likewise being explored.

INSTITUTIONAL PROGRAMS

The principal responsibilities of the Supervisor of Special Education for Institutions during the school year 1960-61 have been in providing technical advice, guidance, and supervision to the educational programs of various State institutions, especially the institutions for juvenile delinquents operated by the State Department of Public Welfare.

Consultative visits were made at planned intervals to the Barrett School for Girls, Boys' Village, Maryland Training School for Boys, Maryland Children's Center, and Montrose School for Girls. Training school education was stressed with particular emphasis being given to curriculum development, effective teaching techniques, in-service training, integration, and school budgets.

The first annual preschool conference for all the training school teachers of Maryland was held on September 1, 1960, at the Maryland Training School. The general theme of the conference was "Training School Education Moves Forward" and was concerned not only with the abilities and needs of delinquent children but also with the role of the teacher in the training school. The conference afforded training school teachers an opportunity for hearing well-known speakers in training school work, for sharing school practices, for discussing problems of mutual interest, and for considering various ways in making their educational program more meaningful.

An in-service training program for the purpose of promoting the professional growth of the teachers at the Barrett Training School for Girls was organized during the second semester. The weekly sessions gave attention to basic training school philosophy, objectives of Barrett School, needs of delinquent girls, human relationships, framework for the curriculum, lesson planning, demonstrations in teaching arithmetic, language arts, science, social studies, home economics, and cosmetology, different means of recognizing achievement, and the extension of present curriculum offerings.

A one-day reading clinic was held for the school staff at Boys' Village. The theme of the clinic was "Helping Training School Boys to Read and to Like Reading."

Dr. L. B. Sharp, Professor of Outdoor Education at Southern Illinois University, Carbondale, Illinois, helped to survey the three boys forestry camps located in Western Maryland with respect to the over-all camp program. Dr. Sharp's findings, conclusions, and recommendations were incorporated in a report and submitted to the Department of Welfare for deliberation and possible implementation.

NATIONAL DEFENSE EDUCATION ACT

Science and Mathematics

Two phases of Title III of the National Defense Education Act were in continuous operation throughout the year to strengthen science and mathematics instruction. One of these was concerned with supervisory and related services from the State Department of Education and the other was concerned with the administration of local acquisition programs for science and mathematics equipment, and minor remodeling.

As a part of the first phase, twenty-three regional conferences were held in five areas of the State for science and mathematics teachers. The purpose of these sessions was to provide opportunities to discuss newest developments, content, and procedures of instruction in science and mathematics.

Assistance was provided local school systems in their continual appraisal and further development of science and mathematics programs in both elementary and secondary schools. Special attention is being given to planned, sequential science programs, in grades 1-12; in-service programs for teachers; and consideration of the many new science and mathematics curriculum programs now under development. Pilot projects were developed to organize, test, and develop new methods, techniques, and procedures for improving science and mathematics instruction.

Acquisitions under this program indicate considerable increases in laboratory facilities, and specialized equipment as integral parts of improved instructional programs in science and mathematics. A greater variety of learning experiences, as well as increased student participation in experimental procedures, becomes available through these acquisition programs.

Modern Foreign Languages

During the year 1960-61, continued efforts were made to implement N.D.E.A., Title III, in the area of modern foreign language instruction. These efforts were concerned with supervisory and related services of the State Department of Education as well as with the administration of local acquisition programs for modern foreign language equipment and minor remodeling.

Conferences and workshops throughout the State provided

opportunities to demonstrate and to discuss the newest developments in materials and methods of instruction in modern foreign language.

Assistance was provided local school systems in their continuing evaluation and further development of foreign language programs. Special attention was given to planning sequential programs; in-service programs for teachers; and consideration of improved instructional materials.

Experimental materials in French and Spanish were developed and distributed to help teachers meet the new goals of language as communication. The audio-lingual concept became more widely accepted. More and more schools offered a minimum sequence of three years of the same language.

Guidance and Counseling

During this year, Title V-A funds were used primarily to provide additional counselors and clerical personnel in the local school systems. Additional counseling time was provided by employing the counselors during the summer months. The employment of clerical personnel freed the counselor from routine duties to devote more time to working with the students. Counselor-pupil ratio in the State continues to be well above the desired 300 to 1.

DIVISION OF VOCATIONAL EDUCATION

AGRICULTURE

Practices and procedures in agricultural education have reflected the unprecedented changes in agriculture and its related occupations. With the increased cost of machinery, farm mechanics instruction has increased tremendously in importance. Ornamental horticulture has assumed a new importance in the suburban counties and has possibilities of bringing vocational agriculture into an area and an occupation which is new. The steady increase in the number and per cent of part-time farmers necessitates a revamping of agriculture subject matter and subject matter distribution. The high cost of farms and equipment has decreased the number of vocational agriculture graduates who actually buy farms, but it has increased considerably the number of father-son partnerships. There is a rapid increase in the in-service training of teachers in local workshops and also advanced college training. The general pattern of farming is changing rapidly in various sections of the State; thus increased emphasis is being given on adapting the course of study to local needs.

Membership in the Future Farmers of America and the New Farmers of America has changed very little in the past ten years. While there are fewer chapters now, consolidation has increased the size of many of these chapters. Activities in these organizations are on three levels—local, state, and national. A wide variety of activities on all three levels has been made possible through most liberal aid and financing by several foundations and organizations. These activities are designed to aid boys to ever greater accomplishments. Splendid motivation is provided through a series of degrees through which a boy may advance according to his achievements. An over-all objective is the development of student leadership. Members are being given increased responsibilities for the directing and planning of their own activities. The culminating activities for the year's work in these organizations are the annual State Conventions held at the University of Maryland and Maryland State College respectively.

TRADE AND INDUSTRIAL EDUCATION

Due to the rapid change in technology in trade and industry, special emphasis has been placed on such courses as electrical technology, industrial electronics, machine design, mechanical and aircraft technology, industrial electric tool design technology, mechanical technology, and laboratory technology.

Part-time cooperative training programs have increased in number and variety of offerings to meet the ever changing needs in industry.

A completely new venture in the trade and industrial educa-

tion field was that of a pilot program for small business, conducted in Washington County. This was a cooperative program, sponsored by the Washington County Board of Education, Hagerstown Chamber of Commerce, Hagerstown Manufacturers' Bureau, Hagerstown Retailers' Bureau, in cooperation with the Small Business Administration. Eight consecutive weekly sessions of two hours each were conducted, with a representative of industry or business the keynote speaker at each. These programs were taped and 16-mm. sound motion pictures were made available through the Vocational Division to those interested in developing a similar program.

EDUCATIONAL SERVICES TO INDUSTRY

A vocational interest survey of Maryland employers was made during the summer of 1960. Questionnaires were sent on a random sample basis to approximately 5,000 employers representing the major business and industry groups in the State. Follow-up interviews were made with those employers who indicated that they employed technicians. This survey has provided information that will be used in planning vocational courses to meet the projected requirements of business and industry in Maryland.

Vocational educators from Pennsylvania, West Virginia, and Virginia met with Maryland in a staff-improvement program at Hancock, Maryland, devoting one series of sessions to "Improving the Day-trade Program," and "Supervisory Training Technique of Job Instruction."

In cooperation with the Maryland Society of Training Directors, a management program was conducted for the Baltimore chapter of the American Society of Life Underwriters. A comprehensive examination was administered by the College of Life Underwriters.

In-service training programs for supervisors were developed and conducted for the A. L. Mathias Company, industrial food service managers, and the Church Home and Hospital.

The annual spring meeting of the Maryland Vocational Association was held at Aberdeen Proving Grounds in cooperation with the U.S. Army Ordnance School. More than two hundred industrial education teachers attended the concurrent teaching demonstrations centered on the latest teaching aids.

The new Vocational Rehabilitation Center at Rosewood State Training School requested assistance in its teacher training program for their trade teachers. These State employers are trade qualified but have no teaching experience requirement for the position. A basic program for developing skills in "job analysis" and "job instruction" was instituted.

HOME ECONOMICS EDUCATION

As part of the continuous effort to have instructional programs keep pace with the changing needs of individuals and families, special thought and attention were given to the following phases of the program :

In the day-school program greater emphasis was given to the areas of housing and family relationships through in-service programs on both State and local levels.

Increased attention in the teaching of foods and nutrition to understanding the basic principles in regard to health, economics, management, and the role food plays in family living rather than the preparation of a standard product.

Increased attention in the teaching of clothing and textiles to achieving a balance between garment construction and other aspects of clothing construction. More time is being devoted to buymanship, wardrobe planning, care, management, aesthetic qualities, and the performance characteristic of textiles.

The program of work in the homemakers clubs for students was built around the topics of family unity and family fitness, and the State project was devoted to developing a greater understanding of senior citizens. In carrying out the program of work the chapter members planned and conducted many worthwhile activities for senior citizens in their respective communities.

A workshop in the area of Child Development and Family Relationships was held for supervisors and teacher educators to define the competences that are needed by teachers for effective teaching in these two areas in the secondary school program.

DIVISION OF LIBRARY EXTENSION

Changes in the pattern of lending services and in the personnel of the Division of Library Extension characterized the activities of 1960-61. With the inauguration of the State-wide lending services of the Enoch Pratt Free Library in Baltimore through contract with the Department of Education, the specialized information and resources of one of the country's greatest public libraries became available to all citizens of the State. Requests are made through local public libraries. The change placed heavier responsibility on local libraries to provide the ephemeral and general current material and the books for children, since these materials are not available through the Pratt Library contract services.

The bulk of the book collection of the Division of Library Extension was dispersed to existing county public libraries to augment local book resources; a smaller group of specialized books was given to the State Library in Annapolis, and the Maryland material and general film collection were allocated to the Pratt Library for use in filling requests throughout the State. The professional library of educational materials for members of the Department and the curriculum materials center for use of educators throughout the State were separated from the original collection and organized into two library collections.

Members of the Division staff participated in a number of professional assignments, conferences, and study groups, without as well as within the State. Miss Mae Graham, Supervisor of School Libraries, was a member of the special committee of the Study Commission of Chief State School Officers which developed the policy bulletin, *Responsibilities of State Department of Education for School Library Services*, published by the Council of Chief State School Officers.

The Division made arrangements for the collection, "Books on Exhibit," containing some 800 new juvenile books to be scheduled throughout the counties of the State through the local boards of education. This collection provides an opportunity for librarians, teachers, parents, and the general public to see and examine current materials as an aid to selection and purchase. Lists of book and film acquisitions by the Pratt Library were distributed to local libraries as a part of the contract services.

PUBLIC LIBRARIES

Public library activities within the State were centered on two primary goals: the establishment of new county libraries and the strengthening of existing libraries through cooperative arrangements among neighboring libraries.

The first goal of complete State-wide library service came nearer to achievement this year when the boards of county com-

missioners in Caroline, Dorchester, and Kent counties voted to provide sufficient funds to establish county public libraries under the provisions of the 1945 public libraries law. During the spring of 1961 these counties began the organization of county library service, leaving only Frederick and Somerset counties without such services. These new county libraries as well as others within the State are being strengthened at the outset by policy decisions to cooperate with neighboring counties in sharing special resources and services.

The Allegany County Library came into being in July, 1960, coordinating the resources and services of the Cumberland, Frostburg, and La Vale public libraries and initiating county-wide bookmobile service in the spring of 1961. The Worcester County Library coordinated the services of the four existing public libraries in the county and initiated bookmobile service in the fall of 1960.

A significant development has been the cooperative activities that have been undertaken by neighboring county libraries in various parts of the State. These projects are demonstrating in Maryland what has been proved in other parts of the country—that libraries can plan and work together to improve the total library service—that better use can be made of funds, of staff with special abilities, and of books. The first of those projects began in Southern Maryland where the three library boards of Charles, St. Mary's, and Calvert counties agreed to try to solve some of their problems of staff through cooperation. They formed the Southern Maryland Regional Library Association, jointly employed a library administrator for the three counties, set up centralized cataloging and processing, and are developing together other services and resources. An executive committee composed of the presidents of the three boards decides on policies affecting the multicounty operation. Library policies for a single county are still determined by the local boards. Each county library is operated as an independent unit except for the activities and services that the three agree should be performed by the Association and for which each county pays a certain amount into the joint fund. At present the regional association staff is composed of one chief library administrator, one part-time cataloger, and two clerk-typists. A position of assistant library administrator has been authorized by the Association, and applicants are being interviewed for this new position. This cooperative arrangement has allowed this area of about 85,000 people to gain strength by sharing. Books move freely from one county to another, board members and staff members meet and confer on common problems, people are aware of libraries in Southern Maryland, both library use and local library appropriations have increased markedly. County commissioners are beginning to see the values of this cooperative arrangement, are no longer so afraid that one county's money may be spent to the advantage

of another county. The people involved in this venture are convinced that it is working successfully and that the further improvement of library service in Southern Maryland will be accomplished through the Association.

Another significant project began less than a year ago on the Eastern Shore when Wicomico and Worcester counties decided to make maximum joint use of the books transferred from the Division of Library Extension by setting up an area reference center called the Lower Shore Area Library Center. This center has as its purpose the supplying of collections of books from the center to the libraries in the two counties, the answering of reference questions referred to it by the two libraries, the preparation of exhibits and display materials, and eventually the ordering, cataloging, and processing of all books for the two counties. In January the new Dorchester County Library joined in the project. Plans have been made to set up centralized processing for the three counties and to expand the plan and purchase the basic equipment that would make it possible for this center to perform the ordering, cataloging, and processing of books for all the counties on the Eastern Shore. If the other libraries on the Shore decide to take advantage of this possibility, it will be of great value in improving library services by freeing the professional librarians from time-consuming, routine tasks that could be done elsewhere. At the present time the Lower Shore Center is located in the basement of the State Teachers College, Salisbury; has a staff of one cataloger, one full-time and one part-time clerk; and is operated through a contractual agreement among the three boards.

Cooperative projects in other sections of the State have included in-service training sessions for staff, sharing of books and other materials, joint book lists and exhibits, and the sharing of experienced professional staff members.

These cooperative projects have been financed partially through Federal Library Services Act funds. The LSA has been extended another five years, 1961-66. Within that period libraries can begin and firmly establish better services through new cooperative patterns. Because of the need for growth through cooperation, a committee appointed by the State Superintendent of Schools recommended revision of old plan for the use of these funds. For the next five years the major portion of Federal LSA funds will be used for cooperative projects. Many libraries in Maryland will be able to attain standards of high quality service only through the cooperative arrangements that will make specialized materials, staff, and services available on a regional basis.

Conferences

Conferences held this year were focused on needed staff training and on planning for further library development.

In December the public library administrators met at the in-

vation of the Department of Education and decided to form an autonomous association known as the Maryland Association of Public Library Administrators. Miss Elizabeth Hage, Director, Prince George's County Memorial Library, was elected chairman. The group, with the cooperation of the Division of Library Extension, held two one-day meetings—one to discuss the public library legislation and the other to discuss the lending services of the Enoch Pratt Free Library under the contract with the Department of Education and the changes in the use of Federal Library Services Act Funds.

Two regional conferences on selection and use of reference books were held for staffs of local county libraries. About forty persons attended the sessions at Cumberland and Salisbury. Consultant for both conferences was Miss Mary Barton, former Head, Reference Department, Enoch Pratt Free Library.

"Public Library Work with Children" was the theme of a one-day State-wide conference for all public library staffs. The program was prepared by a committee of librarians under the chairmanship of Miss Mae Graham of the Division of Library Extension. Principal speaker was Mrs. Ruth Hill Viguers, editor, Horn Book Magazine. About seventy persons from all over the State attended.

A conference on "Public Library Development" for trustees and librarians on the Eastern Shore was held in June to bring new trustees and librarians together to discuss library services and cooperative plans. Miss Ruth Warneke, Assistant Professor of Library Science, Western Reserve University, was the consultant and speaker. About forty trustees and seven librarians from the 7 county libraries on the Eastern Shore attended.

Other Highlights

Mr. P. D. Brown, Trustee, Charles County Public Library, was awarded a national trustee citation by the American Library Association at its annual conference. The citation emphasizes his outstanding contribution to library development in Southern Maryland and the State and his efforts to secure improved legislation for public libraries.

SCHOOL LIBRARIES

National recognition of the school library as a part of instruction and the concept of the school library as an integrated materials center provided both school administrators and librarians with the impetus and the direction they needed to make 1960-61 the most successful year so far in the development of the school library program in the State.

The Division of Library Extension sponsored two meetings for principals, supervisors, and librarians to discuss The School Library as an Instructional Materials Center and one for school library supervisors and directors of instruction to discuss the same topic.

The Supervisor of School Libraries worked with study committees in Frederick, Howard, and Montgomery counties where they were making detailed, statistical studies of the status of their libraries and recommendations for improvement. She also worked with all the school librarians in Caroline County who are developing a manual of uniform organization for the schools in the county.

The supervisors of public and school libraries made a joint survey of all school libraries in St. Mary's County, with recommendations to the Superintendent of Schools and to the County Library Board.

Interest in elementary school libraries continues to grow, and a large percentage of the supervisor's time is spent with elementary supervisors and principals throughout the State. Allegany, Anne Arundel, Carroll, Cecil, Charles, Dorchester, Garrett, Harford, Howard, Kent, Queen Anne's, St. Mary's, Talbot, and Worcester counties asked for assistance with these programs.

Tangible evidences of growth:

1. Increased appropriations for library materials
2. Increased personnel
 - a. Second librarians and/or clerical assistants in large schools
 - b. Increased number of elementary school librarians
 - c. Appointment of school library supervisors in Anne Arundel and Howard counties in June, 1961
 - d. Organization of a Division of Instructional Materials in Montgomery County, with increased staff
3. Central processing and cataloging
 - a. Central processing and cataloging for all libraries in Baltimore City and Montgomery County
 - b. Central processing and cataloging for basic collections in the new schools of Baltimore and Frederick counties
4. High morale
 - a. Active membership of school librarians in the Maryland Library Association and the Association of School Librarians of Maryland
 - b. Attendance of thirty Maryland school librarians at a five-day, non-credit course at Columbia University on the subject, "Audio-Visual Services and the School Library"
 - c. Attendance by more than thirty school librarians at summer school at the University of Maryland or Western Maryland College where library science courses were offered. Attendance by at least ten others at graduate library schools out of the State

These tangible evidences of growth seem to indicate trends for the future:

1. The school library will be generally accepted as part of the school's instructional program and as an integrated materials center.
2. The school library program will begin in the elementary school and extend through the senior high school.
3. School systems will continue to look for cooperative methods of purchasing and processing library materials in order to decrease costs and increase efficiency in use.
4. Local school library leadership at the school system level will continue to increase.
5. School librarians will have increased responsibility to assist teachers as well as pupils in knowledge and use of materials.

DIVISION OF VOCATIONAL REHABILITATION

This was another year of gradual but continuous development of vocational rehabilitation services to persons with disabling conditions heretofore thwarted in their endeavor to join the ranks with their neighbors in suitable and satisfactory employment. The case load persisted in growth. Of a total of 5,925 persons served, 1,491 were rehabilitated. Both of these groups were higher than last year when 5,743 persons were served and 1,413 were rehabilitated. New cases advance to new totals year after year, with 3,834 being referred in 1961, an increase of 115 over last year's number of 3,719. The new cases added to those carried over from the preceding year, amounting to 5,439, brought the total number in the case load up to 9,273. A greater awareness of the effectiveness of vocational rehabilitation services is constantly being promoted by the proof of more successfully rehabilitated persons.

The total cost of the vocational rehabilitation program in Maryland in 1961 was \$1,049,520.26, of which \$602,142.82 was Federal funds and \$447,377.44 was State funds. The total expenditures amounted to less than \$1,137,215.52, which would have been the cost to maintain the rehabilitants on welfare for one year, about one-third less than their annual earnings of \$3,439,592.

Perhaps the outstanding feature of the work in fiscal year 1961 was the effort of the Division to expand and improve services in the five districts * of the State.

SOUTHERN MARYLAND

In Prince George's County the Division cooperated with the County Health Department and the local Society for Mentally Retarded Children in establishing a diagnostic clinic. Through the use of this facility clients of the Division, as well as other mentally retarded children, may have the benefit of thorough social and vocational evaluation.

The Division also cooperated with the Prince George's County Hospital in inaugurating a work evaluation program under which rehabilitation clients are given an opportunity to try out on various jobs in a hospital setting under close supervision. This program has facilitated the satisfactory placement of a number of disabled persons.

In Montgomery County, the Washington Sanatorium and Hospital opened a Prosthetic and Orthotic Clinic staffed by qualified physiatrists, orthotists, physical therapists, occupational therapists, and a counselor of the Division who was given special training in this field. Through this clinic it is possible to provide

* District Offices: Southern Maryland—Hyattsville; Western Maryland—Hagerstown; Eastern Shore—Salisbury; Metropolitan Baltimore; Disability Determinations (OASI).

the best in services to amputees and other orthopedically handicapped clients without the necessity of their traveling to Baltimore.

Through a grant from the Office of Vocational Rehabilitation, U. S. Department of Health, Education and Welfare, the Montgomery County Health Department, in cooperation with the Tuberculosis Association and the Heart Association, established a program for training occupational therapy aides to relieve the acute shortage of trained personnel in hospitals and nursing homes throughout the county. Division staff members participated in the planning and organization of this program.

WESTERN MARYLAND

In the western part of the State, the Division extended to Springfield State Hospital a more intensive program of vocational rehabilitation counseling by adding to the existing service another day and one-half of counselor time. This has resulted in making service available to all those in the convalescent area, as well as to those referred through social service. It has been possible for counselors to see more disabled persons and to work out more rehabilitation plans for patients preparing to be discharged from that mental hospital. In addition, a typing class has been started, using existing equipment, and approximately forty patients are being taught the rudiments of typing or being given intensive brush-up training. This program has proven to be successful, as it has resulted in vocational success in several cases, in addition to the immeasurable therapeutic effect on all students.

During the year, the Division also extended vocational rehabilitation services to the Clifton T. Perkins Hospital and began working with those patients who are considered to be severely mentally ill to the extent of maximum security necessity. Among cases accepted by the Division, there have been good results in training and placement.

EASTERN SHORE DISTRICT

In cooperation with the Governor's Committee to Promote Employment of the Handicapped and the Maryland State Division of Employment Security, there were conducted in two Eastern Shore counties this past year Job Clinics for handicapped workers. In Wicomico County, seventy-five employers from both large and small companies actively participated in interviewing, evaluating, and placing of the handicapped persons referred. In Cecil County, forty-five employers cooperated.

In cooperation with the Maryland Workshop for the Blind and the local Lions Club, a small workshop was set up in Easton for blind workers whose potential is not good enough for industrial or outside employment. Making use of a visiting teacher

from the workshop, training was given to a small number of such blind workers from Talbot, Kent, Queen Anne's, and Dorchester counties. Instruction was in crafts, leather work, and chair caning, with the principal costs to the Division being transportation and supplies. The building, maintenance, and its equipment were donated by the Easton Lions Club. While this operation is small in the number of trainees, it has served an unmet need, and it is expected that it will have further trainees next year.

Two joint civic club dinners and programs in the observance of National Employ and Physically Handicapped Week were sponsored. In Elkton the sponsorship was by Kiwanis, Lions, and Rotary, with Mr. E. K. Foster, Vice-President and Group Executive of Bendix Corporation, as the principal speaker. In Salisbury, this affair was sponsored by the Rotary Club, with Mr. Chester Troy, Chairman of the Maryland Governor's Committee, giving the main address. Successfully rehabilitated workers attend both meetings as special guests.

METROPOLITAN BALTIMORE DISTRICT

The Metropolitan District focused its major emphasis this year on directing staff efforts and professional skill to consolidate gains that had been made in areas already being served.

In the area of the mentally handicapped, a counselor was assigned to the out-patient clinics of Crownsville and Springfield State hospitals, to insure continuity of the programs for clients which had been started during their hospitalization. Another counselor was assigned to work at Rosewood State Training School to evaluate patients for the purpose of selecting those who could benefit from vocational rehabilitation services. Still another counselor, working at Spring Grove State Hospital, participated in a pilot study being conducted to rehabilitate narcotics.

Cooperation with the Richmond Professional Institute in supervising rehabilitation counseling trainees was continued.

One of the counselors who has worked closely with the Heart Evaluation Clinic in Baltimore served on a National Committee for Workshop Evaluation Clinics of the American Heart Association.

The orientation classes for medical students to the field of vocational rehabilitation was continued at the University of Maryland School of Medicine and extended to the nursing students at Mercy, Bon Secours, St. Agnes, Sinai, and Union Memorial hospitals and to public health nurses.

Additional counseling time assigned to Baltimore County permitted an extension of services to more people in that area.

DISABILITY DETERMINATIONS

The Disability Determinations Unit of the Division processed 17 per cent more cases in 1961 than during the previous year. This increase was brought about largely by amendments to the Social Security laws, which became effective during September, 1960. At that time, the age requirements for eligibility to disability benefits were eliminated. The result was a substantial increase in applications from younger disabled persons. The history of legislation to date suggests that the Social Security Disability Program has not yet been stabilized from its conservative beginning in 1954.

During the year, the Unit assisted the Bureau of Old Age and Survivors Insurance in publicizing its disability program by contacting local medical societies and other medical groups. The purpose was to explain the implications of adjudication as related to medical evidence and the need for detailed medical reports. The film, "Disability Decision," which was made available by the Bureau, was shown to medical societies, hospital staffs, and the staffs of State institutions.

MISCELLANEOUS ACTIVITIES

Each year larger numbers of severely disabled persons, including the mentally retarded, are referred to the Division. Since no adequate rehabilitation center facilities are available in Maryland, continued use has been made of the Woodrow Wilson Rehabilitation Center of the Virginia Division of Vocational Rehabilitation. At the Center, vocational evaluation, physical therapy, occupational therapy, work adjustment, and vocational training were obtained for mentally retarded, paraplegic, and other severely disabled clients of the Division.

A study of the possibilities of establishing a sheltered workshop in the upper counties of the Eastern Shore was initiated by the Chestertown local office. Participants have been health departments, boards of education, and county superintendents of schools from Caroline, Cecil, Kent, and Queen Anne's counties. The local welfare departments and Division of Employment Security from these same counties participated, as well as representatives from the ministerial associations, the Veterans Administration Hospital at Perry Point, and the Upper Eastern Shore Association for the Mentally Retarded, and heart associations. A Steering Committee of persons from each of these counties has subsequently met and is continuing its study on the desirability of establishing such a rehabilitation facility for the Upper Eastern Shore areas.

A vocational rehabilitation counselor was employed by the Workmen's Compensation Commission to implement the legislation passed in 1960, and a plan for improved referrals was put into effect with the Division's Metropolitan Baltimore office.

"Comeback" completed its ninth consecutive year as a sustaining public service program on WMAR-TV, Channel 2.

REHABILITATION CENTER AT ROSEWOOD

The establishment of a Rehabilitation Center at the Rosewood State Training School under the Department of Mental Hygiene provided an additional rehabilitation facility. Under a director of education, it provided a training program of job experiences in shoe repairing, food service, upholstery, sewing, and home mechanics to prepare patients for employment as part of the rehabilitation program in the hospital. A trained vocational rehabilitation counselor directed and supervised the hospital rehabilitation program, and a clinic team consisting of a psychologist, a social worker, an industrial therapist, a medical adviser, and a vocational rehabilitation counselor screened the patients into the program and made recommendations as to the types of work activities in which the patients participated.

A counselor from the Division of Vocational Rehabilitation served on this clinic team and, in addition, acted as a consultant in recommending realistic practices and in establishing acceptable standards. Through close cooperative efforts with this newly-created facility in the field of mental disability, many more patients can be rehabilitated into employment in the community.

* Includes 11 pupils receiving instruction through a school-to-home telephone system as follows: Frederick, 3; Montgomery, 3; Prince George's, 1; Washington, 3; Wicomico, 1.

† Includes 133 county children in Baltimore City hospital schools who are distributed to the counties of their residence.

‡ Because Baltimore City changed from a nonqualifying to an equalization unit in 1960-61, severely handicapped pupils were aided through regular State aid funds rather than through this special fund for handicapped pupils.

NOTE: These pupils are in addition to those reported in special classes in TABLES 6 and 7.

* The minimum program in calculating State Equalization aid includes the following:

- (a) total minimum salaries of the allowed number of teachers and principals as determined by State law;
- (b) other current expense including the cost of operation and maintenance and the cost of instruction other than the salaries of teachers, principals, and supervisors; and
- (c) the cost of approved transportation to public schools.

† Tuition applicable to Bylaw 11 included in these columns only.

* Half-time kindergarten pupils, where applicable, are expressed in full-time equivalents in arriving at per pupil costs.

† Beginning year ending June 30, 1957 Social Security payments by State for teachers are included in Total State—Including Retirement and Social Security. Local unit data do not reflect Teachers' Retirement or Social Security payments by State.

Note: This TABLE has been changed to reflect full-time equivalents of kindergartens for years shown; also corrected to exclude State retirement money for related expense fund and agencies other than public schools as previously reported.

* Excludes classes A through J motor vehicles.

† Data are for the year ended December 31, 1960, adjusted as of October 1961.

‡ Estimated by dividing net receipts after distribution to incorporated towns and places by the county tax rate.

§ Fiscal period ends December 31; all others end June 30.

a Includes assessment for tools and machinery and inventories of manufacturers as required by Baltimore City Ordinance number 643.

Ordinance number 1340 provides that this assessment be removed over a four-year period beginning 1959. This figure also includes

assessments for some government property which is in litigation.

b Includes assessments for some government property which is in litigation.

* In accordance with Chapter 6 of the Laws of 1945, tuition for teacher training students at the Teachers Colleges was eliminated as of September, 1945. Beginning in 1957-58 board is \$266 at Bowie, Frostburg, Salisbury, and Towson, for teacher training students planning to teach in Maryland. Junior college students who are residents of Maryland pay \$150 additional; out-of-state students pay \$400 for either junior college or teacher education curriculum.

* Not State-aided in 1960-61 or calendar year, 1960.

† Calendar year unit, 1960.

‡ No report filed.

a Included in population served by county libraries; therefore, omitted from total.

b Six-months' report as State-aided library.

c Six-months' report as non-State-aided library.

d Excludes unexpended balances from previous years and gifts or public money earmarked for buildings and land.

e Includes items paid for outside of the library fund as reported.

f Does not include pamphlets, pictures, and periodicals.

* Includes the following number taking German: Anne Arundel: Brooklyn Sr.-Jr.—60 boys—10 girls; Montgomery: Bethesda-Chevy Chase Sr.—43 boys—27 girls; Montgomery Blair Sr.—41 boys—27 girls; Northwood Sr.—41 boys—16 girls; Walter Johnson Sr.—47 boys—33 girls; Prince George's: Bladensburg Sr.—35 boys—14 girls; High Point—54 boys—15 girls; Total—321 boys—142 girls.

* Includes the following number taking Russian: Baltimore: Towson Sr.—6 boys—16 girls.

INDEX

A

- Academic course, each high school, 226-233
- Accreditation and certification, 39-45
- Administration
 - Cost per pupil, 148-149
 - Expenditures, 216
 - Per cent for, 147
 - Superintendents, 2, 6-19, 211, 216
- Adult education, 161, 163-165, 219
- Agriculture
 - Adult education, 160-161, 163-165
 - Enrollment, 105, 111
 - Each high school, 234-241
 - Federal aid, 160-163
 - Schools offering, 116, 234-241
 - State supervision, 2
 - Teachers, 116
- Aid from State and/or Federal funds
 - Counties and Baltimore City, distribution by type of fund, 143-146, 194, 212-213
 - State teachers colleges, 186-187, 194-195
 - Vocational education, 159-163, 194, 213
 - Vocational rehabilitation, 192-193, 196-197
- Appropriations
 - County, 143-145, 175, 194, 214
 - State, 143-145, 194, 212
- Art, high school
 - Enrollment, 102, 112
 - Each high school, 234-241
 - Schools offering, 116, 234-241
 - Teachers, 116
- Assessable basis, 176-178
- Attendance
 - Average daily, 209
 - Each high school, 226-233
 - Per cent of, 209
 - Teachers at summer school, 122
 - Workers (see Pupil personnel)
- Atypical children, 81-88
- Auxiliary agencies (see Other school services)

B

- Bands, orchestras, glee clubs, 115
- Basic aid per classroom unit, 194, 212
- Belonging, average number, 209
 - Each high school, 226-233
 - Per teacher, 93
- Birth rates, 89-91
- Board of Education, State, 2, 194, 196
- Boards of Education, counties, 6-19
- Bonds outstanding, school, 172
- Books and instructional materials
 - Cost per pupil
 - Elementary, 152
 - High, 153
- Expenditures
 - All schools, 217, 223
 - Elementary, 224
 - High, 225
- Per cent of current expense budget, 147
- Boys and girls
 - Enrollment
 - Nonpublic, 202-208
 - Public, 201
 - Graduates, high school, 97-104
- Budget
 - Baltimore City, county, local, 143-145, 175
 - State public school, 194
 - State teachers colleges, 194-195
- Buildings
 - Cost (see Capital outlay)
 - Number of, 119-120, 200
 - Value of school, per pupil, 171
- Business education
 - Adult, 164-165
 - Enrollment, 105, 113, 162, 164-165
 - Each high school, 234-241
 - Schools offering, 116, 234-241
 - Teachers, 116

C

- Capital outlay, school, 143, 147, 170
 - By site, building, equipment, 222
- Certificate status, teachers 126-129
